

Protein Structure Analysis ...done *RIGHT!*

BioTools, in collaboration with Applied Photophysics, is proud to introduce the first unified commercial databases for spectral analysis.

Now, you can compare results from
CD, FT-IR & Raman
by eliminating differences between
databases and algorithms!

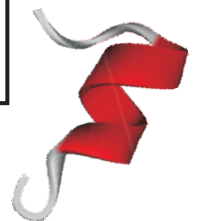

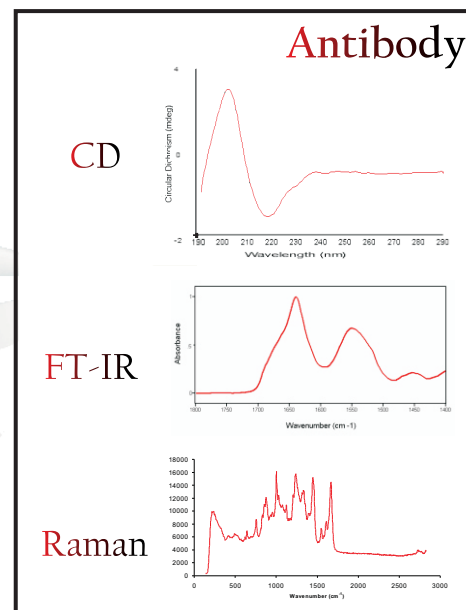

SAME PROTEINS

SAME ALGORITHM

Three Databases

Measured on the BEST products:
PROTA, Chirscan, μ -BioRAMAN

*The technology. The knowledge. The products.
The support. The commitment.*
